February 11, 2020, cumulative update for Project Server 2013 (KB4484262)

This security update resolves a cross-site-scripting (XSS) vulnerability that exists if Microsoft SharePoint Server does not correctly sanitize a specially crafted web request to an affected SharePoint server. To learn more about the vulnerability, see [Microsoft Common Vulnerabilities and Exposures CVE-2020-0693](#) and [Microsoft Common Vulnerabilities and Exposures CVE-2020-0694](#).

February 11, 2020, cumulative update for SharePoint Enterprise Server 2013 (KB4484263)

This cumulative update package includes cloud hybrid search capability to SharePoint Server 2013. [Learn about cloud hybrid search for SharePoint](#).

This cumulative update package fixes the issues that are described in the following Microsoft Knowledge Base (KB) article:

- [Description of the security update for SharePoint Foundation 2013: February 11, 2020 (KB4484264)](#)

February 11, 2020, update for SharePoint Enterprise Server 2016 (KB4484257)

SharePoint Hybrid Auditing (preview) is deprecated. The Hybrid Auditing documentation link is now removed from the SharePoint Central Administration page.

Description of the security update for SharePoint Enterprise Server 2016: February 11, 2020

This security update contains improvements and fixes for the following nonsecurity issues in SharePoint Server 2016:

- SharePoint Hybrid Auditing (preview) is deprecated. The Hybrid Auditing documentation link is now removed from the SharePoint Central Administration page.

- The Dutch word breaker unexpectedly breaks the names "Anneleen" and "Kathleen" into compound words. This causes search errors.

- When you upgrade a SharePoint Server 2013 site to SharePoint Server 2016, if the site uses a Serbian language pack and runs workflows that are configured to use the **Workflows** site collection feature, the in-progress workflows no longer work. This update fixes the problem. To make the workflows work, toggle the **Workflows** feature off and then on again after you apply this update.

- Fixes an issue in which you can't open the Compliance dialog box by selecting the **Compliance Details** entry from the ellipsis menu.

- Fixes an issue that causes SharePoint mobile view to fail if there is no User Profile Application (UPA) service application or My Site that is associated with the web application.

This security update contains fixes for the following nonsecurity issues in Project Server 2016:

- You receive the following error message when you save or submit a timesheet that has has a newly locked task:

  "An error occurred while communicating with the server. Check connectivity with your administrator to determine whether further action is necessary."

- Consider the following scenario:

  - You have server event code on the publishing event that extracts data from a project through the client-side object model (CSOM).

  - You open a project by using Project or Project Web App.

  - You make changes in the project.

  - You publish the project.

  In this scenario, the publishing event code that reads the project data runs for more than a minute and then times out. As a result, the event unexpectedly cancels the publishing job.

February 11, 2020, update for SharePoint Server 2019 Language Pack (KB4484225)

SharePoint Hybrid Auditing (preview) is deprecated. The Hybrid Auditing documentation link is now removed from the SharePoint Central Administration page.

Description of the security update for SharePoint Server 2019: February 11, 2020

This security update contains improvements and fixes for the following nonsecurity issues:

- Adds support for the SameSite cookie attribute to remain compatible with changes in how web browsers such as [Chrome](#) handle cookies.

- SharePoint Hybrid Auditing (preview) is deprecated. The Hybrid Auditing documentation link is now removed from the SharePoint Central Administration page.

- This update successfully crawls empty files that were previosuly reported as crawl errors.

- Fixes the Content Deployment job bug that causes failures and returns an "AppFiles (Template ID:126) list already exists" error message.

- Fixes the crawl failure that occurs if a document library contains an item that has a document ID URL that points to another site collection.

- Fixes the issue in which List items appear in the wrong group in Modern UI.
